

# REMARKS

This amendment is submitted concurrently with a Request for Continued Examination and follows entry of the previously submitted amendment of November 17, 2005.

Specifically, Claim 2 has been amended beginning at Line 22 deleting "and a pair of table side end clamps" and inserting "the central locking component having an upwardly open C-shaped configuration slidably configured to clamp the cubic test device to the flat plane surface."

All grounds of objection and rejection are deemed to have been overcome. Reconsideration and a notice of allowance are requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "E. P. Dutkiewicz".
